Whalepod is a classic British luxury floating cabin. It is inspired by the deep-sea blue whale. It represents the concept that technology comes from nature and is also an expectation of dreams.

Whalepod “芯与鲸华”

—— Classic Luxury British Floating Cabin

The shape of the Whales | Whale series floating cabin is inspired by the deep-sea blue whale. The combination with the NFT brainwave chip not only represents the concept that technology comes from nature, but also an expectation for dreams.

As the first 4S human energy suspension cabin launched by Whales Group, "Whales" brings you not only an unprecedented suspension experience, but also amazing effects.

Whalepod applies cutting-edge high-energy physics research results, and is equipped with NFT brainwave sleep aid chip for the first time in the world, realizing the perfect integration of natural frequency technology, ultrasonic cell massage system, vital signs monitoring and other technological systems, bringing you a subversive floating experience and effect. .

Whalepod · 鲸华

Whalepod is equipped with the international advanced NFT sleep aid system and ultrasonic nano wave physiotherapy technology, and is widely used in sports potential development, medical physiotherapy rehabilitation, mental health intervention and other fields.

Reliable Structure Design

Profile

The keel structure designed on the basis of structural mechanics uses M-C4040 structural profiles (GB/T 5237), with a full load bearing capacity of $\geq 2400\text{KG}$. After anodizing technology, it is resistant to corrosion and wear and has a service life of ≥ 15 years.

Water tank

Using polyurethane integrated molding, under the same conditions, the thermal insulation efficiency of the floating liquid is increased by 33%, and the water leakage accident rate is reduced by 86%.

Anti-shock detection

Tested according to IEC60335-1:2010 method, equipment breakdown voltage $\geq 3000\text{V}$, working at 1.06 times the rated voltage, the measured leakage current is 0.005mA, which is only one-fifth of the national standard.

EPA Grade Water Treatment System

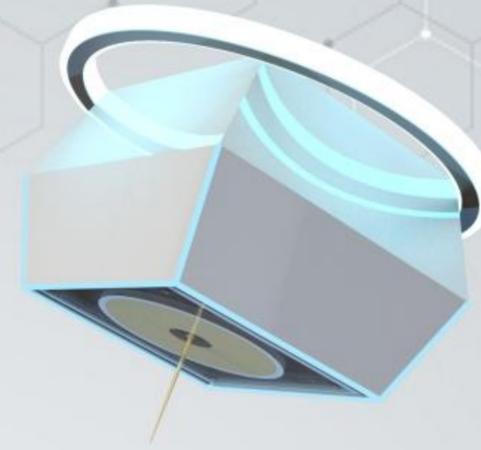

- ◆ Multi-layer filtration purification
- ◆ Efficient sterilization and purification
- ◆ Intelligent drug delivery system
- ◆ water quality testing system

Floating fluid can be used stably for 1200 times!

NFT

During deep sleep, the hippocampus brainwave frequency of the human brain is exactly 7.38Hz, which is in line with the natural frequency. The natural frequency chip embedded in the Whalepod can accept the natural frequency that is beneficial to the earth and produce a harmonious "resonance" with the human brainwaves. Thereby improving human brain waves, reducing human tension, anxiety and other negative emotions, inducing the human body to quickly enter a deep sleep state, and improving the effect of floating healing.

Multi-frequency brainwave interference technology

Whalepod can adjust the corresponding floating mode according to different applicable groups, and use the corresponding brain waves to interfere to better enhance the floating effect.

Research Report of Jacksonville University

Whalepod is embedded with a natural frequency chip. Double-blind test experiments have shown that this technology can resonate with the hippocampus of the brain, enhance our biomagnetic field, and perform well in reducing stress, improving sleep, and enhancing human energy.

Table 1. Descriptive statistics for the anxiety, perceived stress, mood and sleep quality outcomes

Outcome	Change Score Sleep Bracelet	Change Score Placebo Bracelet
	Mean (SD)	Mean (SD)
Anxiety*	-5.52 ± 1.86 (6.11)	-3.80 ± 1.80 (5.94)
Perceived Stress*	-3.41 ± 1.72 (5.66)	-1.64 ± 1.45 (4.78)
Profile of Mood States*	-15.34 ± 5.71 (18.77)	-9.36 ± 4.31 (14.18)
Pittsburg Sleep Quality Index*	-3.00 ± 1.00 (3.30)	-1.86 ± 0.86 (2.83)

* = Significant difference between SB and PB change scores; SD = Standard deviation.

α float mode

Improve memory, enhance learning ability, suitable for young people to float.

θ float mode

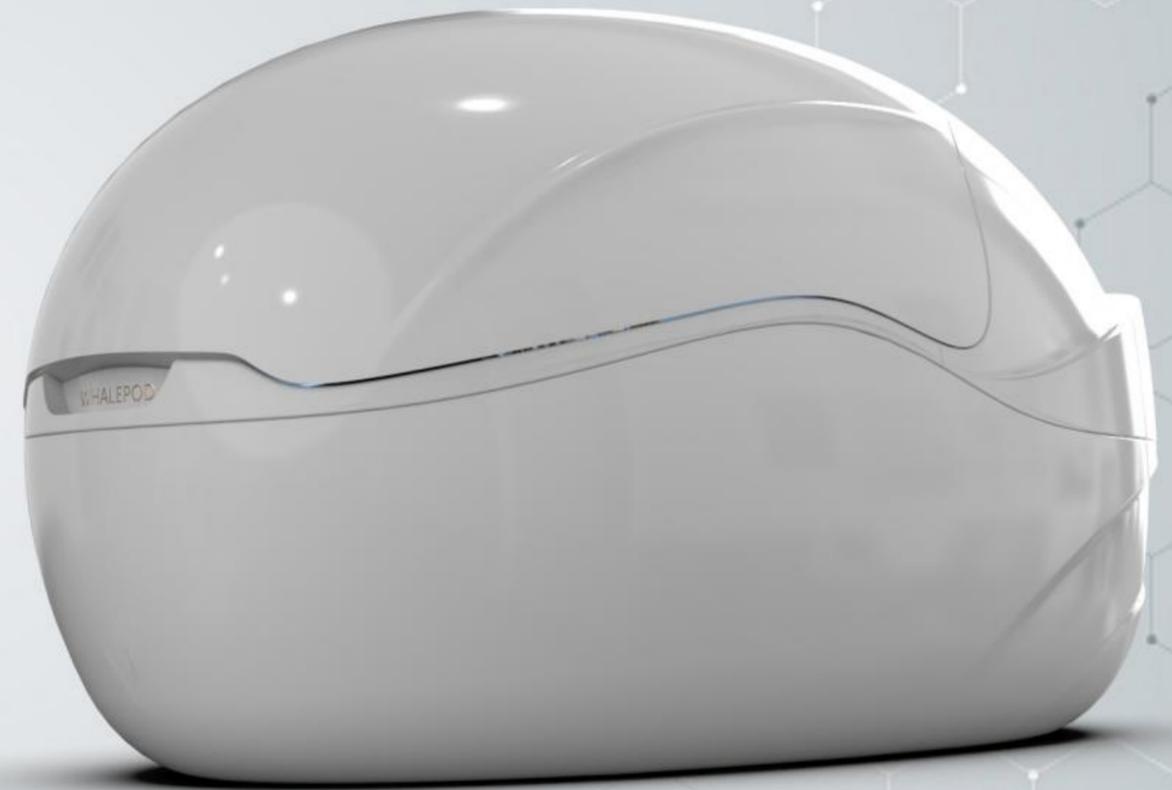

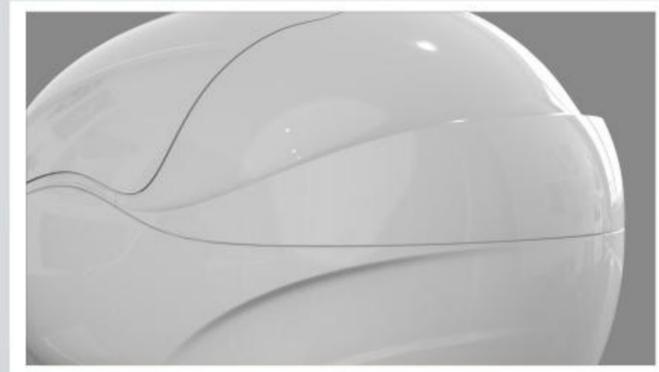

Enhance psychological cues and improve sports performance, suitable for sports rehabilitation and floating.

δ float mode

Accelerates the floater to enter a deep sleep state, relieves fatigue, improves self-healing ability, and is suitable for sub-health conditioning and floatation.

Whalepod

Technology comes from nature
Ingenuity to create perfection

Whalepod · 鲸华

Applying cutting-edge high-energy physics research results, the world's first NFT brainwave sleep aid chip has realized the perfect integration of natural frequency technology, ultrasonic cell massage system, vital signs monitoring and other technological systems, bringing you a subversive floating experience and effect.

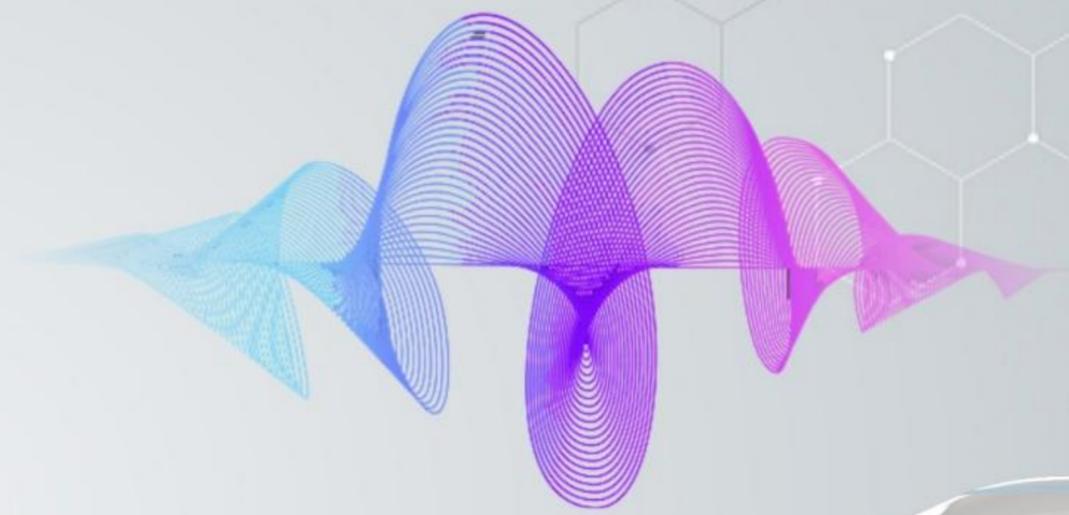

Vital Signs Monitoring Technology

Real-time monitoring of the changes in the vital signs of the experiencer in the floating cabin can not only ensure their safety in the cabin, but also formulate corresponding physical training or rehabilitation physiotherapy plans based on the body data while floating to help the experiencer better of the body's self-recovery.

- Heartbeat
- Heart rate
- Brain waves
- Breathe
- Blood pressure
- Body temperature

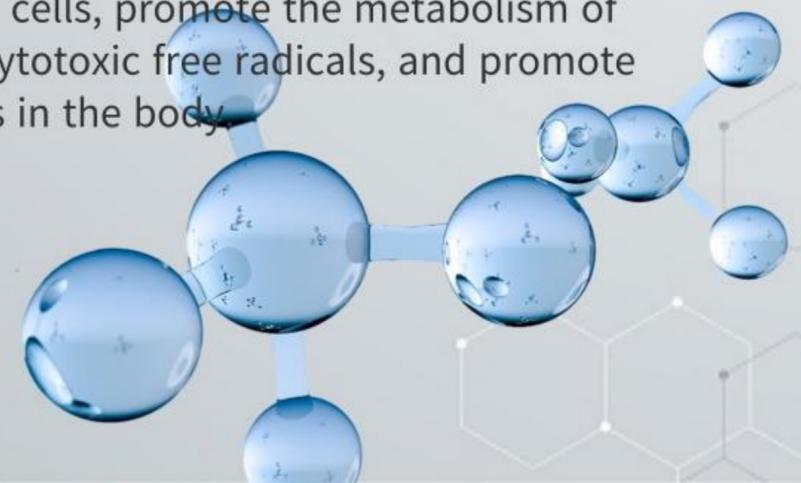

Smart Voice Control Free Hands

Ultrasound Cell Massage Technology

Use 45000Hz high-frequency vibration to separate the air and water in the liquid to form 5-10um water-vapor mixed bubbles, which expand and burst under the action of sound pressure, forming high-frequency microbubble shock waves, providing cell-level massage for the body and accelerating lactic acid metabolism. , the rapid link muscle fatigue.

At the same time, hydrogen is given to the floating fluid, which can effectively activate cells, promote the metabolism of athletes, effectively remove cytotoxic free radicals, and promote the repair of damaged tissues in the body.

Hi Evan
Open the hatch!

hatch is open

Hi Evan
Turn on the lights!

The lights are on

Hi Evan
Start filling!

OK, watering

Equipment size

Heating power: 8000W

Working voltage: 220V

Frequency: 50Hz

Circuit Requirements:

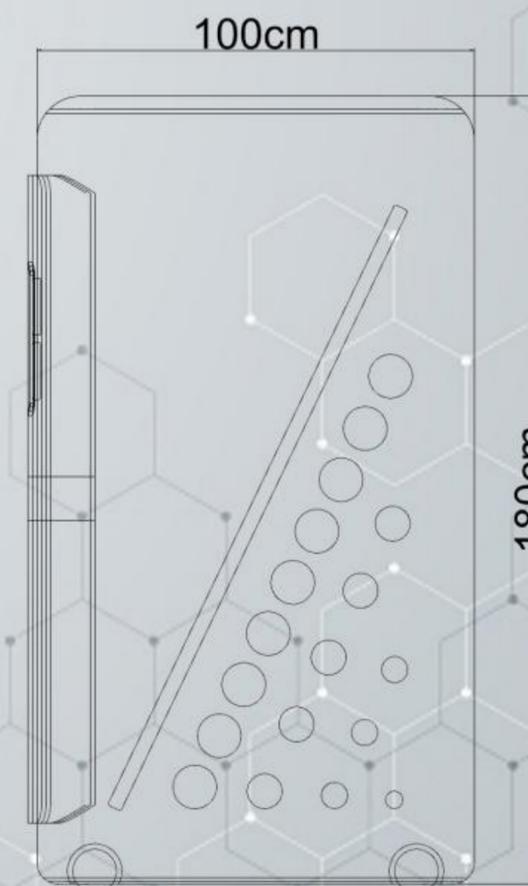

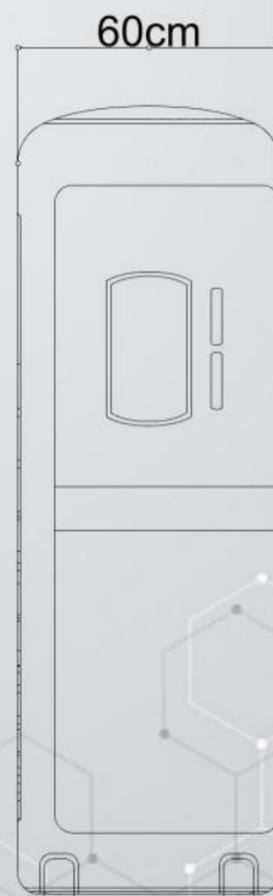

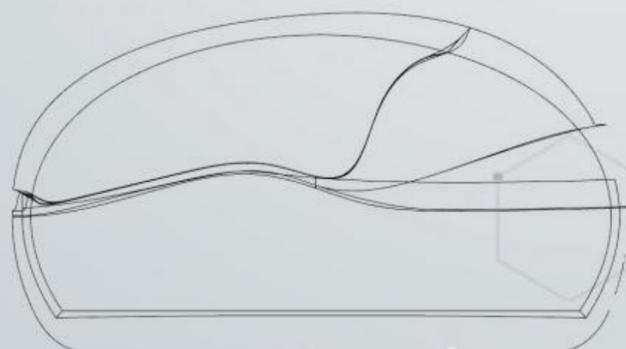

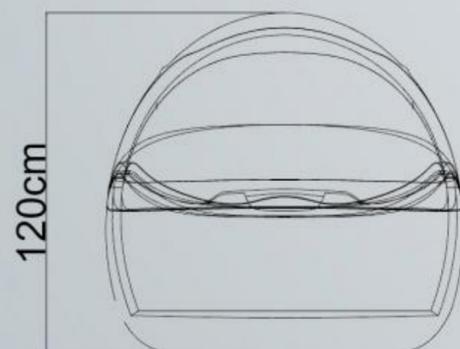

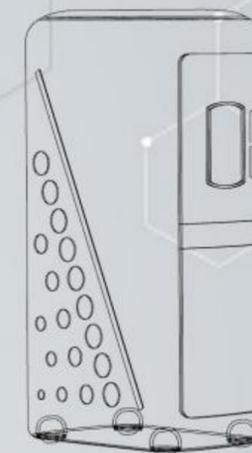

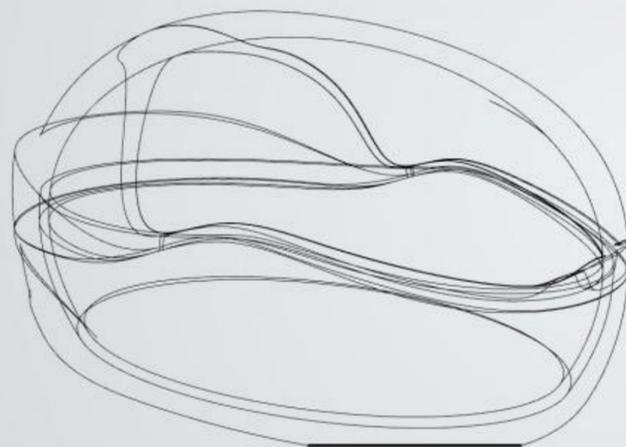

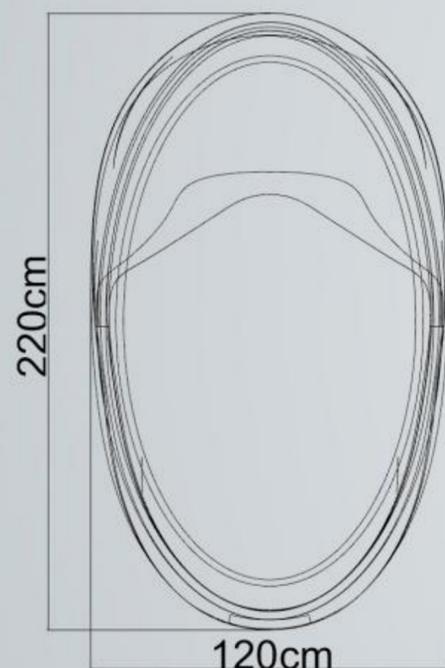

It needs to use 6 square lines to access the floating room,
Install a 63A air switch with leakage protection.

Internal noise during operation: $\leq 20\text{DB}$

Internal light at runtime: $\leq 0.03\text{LUX}$

Equipment working environment: indoor $10^{\circ}\text{C}-35^{\circ}\text{C}$

Relative humidity: above 28°C , 90% non-condensing

19 core technology patents

Whalepod The collision with contemporary art is the combination of inspiration and dynamism. Discover the beauty of nature and explore the connections between art, technology and craftsmanship. Let the classics exceed expectations, let legends become immortal, lead the era, and learn from the brilliance together.
